

ULTRASHIELD BIO-ACTIVE

PLUS+

Contains: Active Sprint Enzymes.

The Ultimate Multi-Surface Cleaner for walls, floors, machinery, filters and vehicles - and for deep and maintenance cleaning in manufacturing, engineering, warehousing & distribution centres, garages and other industrial environments

- Significant cleaning power + greater cleaning thoroughness
- Easy to use and safer for staff
- Easier COSHH compliance and reduced risk of bacterial infections when compared with other surface cleaners
- Active Sprint Enzymes go on working - so you use less cleaner and save money
- Works best at lower water temperatures – saves heating costs and energy
- Replaces the need for traditional toxic cleaners
- Less damaging to equipment and fixed assets
- Both dirt and cleaner biodegrade - cuts pollution and disposal costs

ACTION

UltraShield Plus+ is a concentrated rapid action biological cleaner for all surfaces - including tough machine cleaning. **UltraShield Plus+** unique enzymatic action removes oils, grease, organic matter, starch and stains by digesting the soiling matter - it also stops the growth of moulds and fungi and can stop the growth of pathogenic bacteria. **UltraShield Plus+** enzymes remove soiling naturally (as nature intended), but do it rapidly without the need to use toxic and harmful chemicals. Having done their cleaning job these enzymes then just keep on working - unlike traditional chemicals.

RECOMMENDED DILUTIONS

	Treatment	Application
1:150	Heavy oils, grease and mould machines and filters.	Apply manually or with appropriate machine. Apply foam or soak. Contact time from 10 to 60 minutes.
1:200/1:300	Grease covered walls, floors, Ceilings, filters and machinery etc.	Apply manually or with appropriate machine and use as above. Contact time 10 to 30 minutes.
1:250/1:500	Sealed floors, tiles floors and interiors and exteriors of vehicles.	As for walls and floors above.
1:300/1:750	Maintenance cleaning of all surfaces.	Apply in the usual manner. Allow 2 to 10minutes for the product to work efficiently

NOTES

Do not mix with other chemical cleaners

Most effective when used in warm water 15^oc to 50^oc

Do not overdose, the product **does not** become more effective at concentrations above 1:50

For tyre marks and solidified grease a hard brush or pad is recommended
